# Why should you train with GOMACO University?

The importance of GOMACO University is proven best by those who return each year. Over 225 students have returned to GOMACO University for at least five years, and have received their letter jackets. Most students will tell you that once is not enough, and every time you return, you'll learn something new to use in the field.

With over 80 years of combined experience, the GOMACO University staff and our GOMACO service representatives, who travel the world during the paving season, look forward to teaching and sharing their knowledge with you during the school year.

GOMACO University classes are available on most models of GOMACO equipment, and cover the maintenance and diagnostics on the GOMACO G+, G22 and G21 control systems. A wide variety of 3D classes are also offered. The 3D classes are taught by our specialized GOMACO 3D experts, alongside representatives from Topcon, Leica Geosystems, or Trimble.

GOMACO University provides the best learning environment possible, with both classroom sessions and hands-on machine training during shop time. For more information about GOMACO University, or to register for a class, please visit [www.gomaco.com/university](http://www.gomaco.com/university).

## GOMACO University's COVID-19 Guidelines

- Class sizes will be limited, no exceptions in 2022.
- Masks will be mandatory at all times.
- Social distance when possible in the classroom and shop.
- Anyone attending class should be healthy before leaving home. Should you spike a fever in Ida Grove, you will be sent home immediately.

*Guidelines are subject to change.*
